## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election of Group II and species OEA and rimonabant in the reply filed on 19 December 2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Claims 1-15, 32 and 34-36 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim.

### ***Status of Action***

Claims 16-31 and 33 are examined.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 23-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In particular, the ED10 and ED50 are population dependent. Therefore, to just recite an amount below the ED50 is indefinite. Examiner suggests an amount, for example mg/kg, or the like.

Claims 18-19, 23-25 and 33 are rejected under 35 U.S.C. 112, second paragraph, as lacking antecedent basis. Claims 18-19, 23-25 and 33 recite the limitation "antagonist" in the claim. There is insufficient antecedent basis for this limitation in the claim. Specifically, claim 16 simply recites a "cannabinoid CB1 receptor". Throughout this application, Examiner has interpreted the antagonist to be a cannabinoid CB1 receptor antagonist.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 16-22, 26-31 and 33 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 99/60987.

The '987 reference teaches a composition in dosage unit form (see page 10 line 6) comprising OEA and SR141716A (see page 6 lines 6-10) wherein the Examiner interprets the word "composition" to include actives that are mixed or not mixed together and is not limited to components which are physically connected.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory

Art Unit: 1614

obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 16-31 and 33 are provisionally rejected on the ground of nonstatutory double patenting over claims 59 and 61-62 of copending Application No. 11/587100.

This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

The subject matter claimed in the instant application is fully claimed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter, as follows: a composition comprising a PPAR alpha agonist and a CB1 antagonist.

### **Conclusion**

No claim is allowed.
